

*"Buy that which appreciates and lease that which depreciates."*

**J. Paul Getty**

#### **NO NEED FOR COMPROMISE**

You don't have to postpone or delay putting the latest and best equipment to work for you. Enjoy productivity improvement with the right tool for the job - without compromise.

#### **100% FINANCING**

Leasing offers you the productivity of the technology you require while meeting cash flow needs. Additionally, "soft" costs such as installation, set up and service contracts can be included in the monthly payment.

#### **PROVIDES A HEDGE AGAINST INFLATION**

Lease payments are fixed and allow you to pay for today's equipment with tomorrow's dollars as you earn them.

#### **PRESERVES CASH AND CREDIT LINES**

Leasing is a proven way to conserve capital while acquiring needed equipment. Leasing does not tie up existing credit lines. It allows you to keep capital available for critical areas such as personnel, inventory, or advertising.

#### **LOW MONTHLY PAYMENTS**

We can customize a lease plan that will fit in to your budget needs. Payments can be lower than conventional financing.

#### **NO DOWN PAYMENT**

This preserves and protects your cash flow, making your money available to work for you rather than sinking it into a depreciating asset.

#### **FLEXIBLE LEASE TERMS**

Choose from a variety of lease terms to suit your individual needs. We will quote all options to you so that you make an informed decision.

#### **OPTION TO BUY**

If you decide that you want to own the equipment at the end of the lease, you may do so by simply paying the amount specified in the terms of the lease.

#### **EASIER BUDGET FORECASTING**

Fixed monthly payments allow you to accurately forecast budgets.

#### **Leasing Industry Trends**

Equipment leased in the U.S. was estimated to have risen from \$220 billion in 2004 to \$248 billion in 2005.\*

33% of all equipment acquisitions were leased.\*

80% of all companies, large and small, lease equipment.\*
